

LEE ENFIELD No4 Mk1, The classic Lee Enfield, an icon of the weapon world, used in a bunch of conflicts around the world. Originaly made in the UK, the build quality on these examples shines! The Enfield is a do-all rifle and is very versatile, great for the farm for some pest control, throw it in the bakkie and it's there when you need it. With ammo being readily available this is a rifle you can shoot all day long. Or take it hunting in the bush. For the price they go for, it is a firearm that I encourage gun owners to have for any occasion or to teach the little ones how to shoot a bigger calibre!
